AgfA, CsgA and AgfA-homologue fimbrin subunits, respectively (2)
Cd directing recombination of a recombination for the chromosome of the homologous species; (3) directing recombination of a recombinant gene into the chromosome of the homologous species, replacing the native comprising separating an amino acid polymer comprising a recombinant AgfA comprising separating an amino acid polymer comprising a recombinant AgfA protein containing a replacement segment or segments of foreign amino acid sequence or sequences grown on a Salmonella, E. coli or acid sequence or sequences grown on a Salmonella, E. coli or Enterobacteriaceae host cell, from the host cell and introducing the polymer into the animal in conjunction with a carrier or diluent. (I) is useful for the expression of recombinant AgfA protein which is useful for sequence of sequences antigens are presented in high numbers (up to 100 copies/cell), the hybrid fimbrin protein possesses both the immunogenicity and adhesion properties relevant for an efficient live vaccine, the heterologues are insurant for an efficient live vaccine, the high may be important for firefrican immune response

CC sequence which encodes a foreign epitope or antigen. Also described are:

(1) use of thin aggregative fimbriae (SEP17/TAF) nucleation depended

CC assembly system of strains of Salmonella, Escherichia coli and

CC Enterobacteriaceae for the production of fimbriae comprising recombinant

CC AgfA, CegA and AgfA-homologue fimbrian subunits, respectively; (2)

CC directing recombination of a recombinant gene into the chromosome of the

CC back into the chromosome of the homologus species, replacing the native

CC comprising separating an amino acid polymer comprising a recombinant AgfA

CC comprising separating a replacement segment or segments of foreign amino

CC acid sequence or sequences grown on a Salmonella, E coli or

CC protein containing a replacement segment or segments of foreign amino

CC protein containing a replacement segment or segments of foreign amino

CC protein containing a replacement segment or segments of foreign amino

CC protein the animal in conjunction with a carrier or diluent. (I) is

CC useful for the expression of recombinant AgfA protein which is useful for

CC useful for the expression of recombinant in a fimbrial presentation

CC solonous antigens are presented in high numbers (up to

SOLO,000 copies/cell), the hybrid fimbrin protein possesses both the

communogenicity and adhesion properties relevant for an efficient live

communogens, which may be important for directing an immune response

CC adainst the inserted entrone and hybrid fimbriae are assy and

                                                                                                                                                                                                                                                            The invention relates to an isolated peptide capable of binding a mammalian plasma protein or of generating an immune response in a mammal selected from sequences shown in ABR02642, ABR026449. The peptide or antibody is useful for treating a bacterial infection in a human or animal or in the manufacture of a medicament for the prophylactic treatment of a bacterial infection, such as Bsoherichia coli, Salmonella or Shigella infection. The peptide that is immobilized on a solid support is also useful as a reagent for determining the ability of a plasma protein to bind to bacteria. The present sequence represents an E. coli 15 kDa protein
                                                                                                                                                                                                                                                                                                                                                                                                                                                          New isolated peptide capable of binding a mammalian plasma protein, useful in the manufacture of a medicament for the prevention and/or treatment of a bacterial infection, such as Escherichia coli, Salmor or Shigella infections.
                                                                                                                                                                                                                                     Sequence 151

      Pred. No. is the number of results predicted by chance to have a score greater than or equal to the score of the result being printed, and is derived by analysis of the total score distribution.
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                 689

1. SUBCELLULAR LOCATION: Outer membrane (By similarity).

1. DOMAIN: CONVENINS 153 IMPERFECT REPRAITS OF THE CONSENSUS OCTAPEPTIDE A-G-Y-G-S-T-L-T; FURTHER ON A 16-RESIDUE AND REGIONAL 48-RESIDUE PERIODICITY IS SUPERIMPOSED.

1. MISCELLANEOUS: A STRUCTURAL MODEL IS SUGGESTED IN WHICH NUCLEATION PROTEIN DISPLAYS A SYMMETRY RELATED TO THAT C.

2. SIMILARITY: Belongs to the bacterial ice nucleation protein.

SUBCELLULAR LOCATION: OUTER membrane (By similarity).
DOMAIN: CONTAINS MANY IMPERFECT REPEATS OF THE CONSENSUS
OCTAPEPTIDE A-G-Y-G-S-T-X-T; FURTHER ON A 16-RESIDUE AND A
REGIONAL 48-RESIDUE PERIODICITY IS SUPERIMPOSED.
SIMILARITY: Belongs to the bacterial ice nucleation protein
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                       European Bioinformatics Institute.
